

### SYSTEMIC ANTI-CANCER THERAPY STUDY

National Confidential Enquiry into Patient Outcome and Death (NCEPOD)

#### ORGANISATIONAL QUESTIONNAIRE

# CONFIDENTIAL For this questionnaire 'organisation' means Hospital not Trust. A separate questionnaire should be filled in for each hospital/centre/stand-alone unit delivering Systemic Anti-Cancer Therapy (SACT). Name of Hospital Name of Trust Who completed this questionnaire? Name Position

#### What is this study about?

NCEPOD is examining the process of care of all patients who die within 30 days of systemic anti-cancer therapy (SACT), looking for areas where their care might have been improved. Please see "Definitions" on last page. The study will not concentrate solely on those patients who have a treatment-related death.

Data for the pilot study were collected during September 2006 from selected sites that volunteered to help with the pilot. Sites for the main study will include all NHS and independent hospitals, and day centres, that treat patients with SACT in England, Wales and Northern Ireland, and public hospitals in the Isle of Man, Jersey and Guernsey, as well as Defence Secondary Care Agency hospitals.

This work is supported by the Joint Collegiate Council for Oncology (JCCO), a joint group between the Royal College of Radiologists and Royal College of Physicians; and the Joint Specialty Committee (JSC) for Medical Oncology at the Royal College of Physicians.

#### Who should complete this questionnaire?

Hospitals that treat patients with SACT either as inpatients, outpatients, or both, should complete an organisational questionnaire.

Please return completed questionnaires to NCEPOD in the SAE provided.

#### How to complete this questionnaire

This form will be electronically scanned. Please use a black or blue pen. Please complete all questions with either block capitals or a bold cross inside the boxes provided e.g.

Does this hospital treat patients with SACT as:

If you make a mistake, please "black-out" the incorrect box and re-enter the correct information, e.g.

Unless indicated, please mark only one box per auestion.

A list of definitions is provided on the back of the questionnaire. Free space is also provided for your comments.

Incomplete or non-returned questionnaires will be followed up. Please complete as accurately as you can, so you can compare your results to national averages.

#### Questions or help

If you have any queries about the study or this questionnaire, please contact NCEPOD at cancertherapies@ncepod.org.uk

Telephone: 020 7920 0999

Thank you for taking the time to complete this questionnaire. The findings of the full study will be published in late 2008.

## **DEFINITIONS**

| 0                                   | Describes a marking in the group and of all access to be all all access |
|-------------------------------------|--|
| Cancer Centre                       | Provides expertise in the management of all cancers including common cancers within their immediate locality and less common cancers by referral from Cancer Units. They provide specialist diagnostic and therapeutic techniques including radiotherapy.  |
| Cancer Unit                         | Supports clinical teams with suffficient expertise and facilities to manage the more common cancers.   |
| Clinical Oncology                   | Physician specialising in treatment of cancer using radiotherapy and/or systemic therapy.  |
| Chemotherapy extravasation          | Leaking of the drug out of the vein and into the surrounding tissues.  |
| Chemotherapy Nurse                  | Nurse who has received training to administer SACT.  |
| GCSF                                | Granulocyte colony-stimulating factor. A growth factor that stimulates the bone marrow to make neutrophils and some other types of white blood cells. It is also known as filgrastim.  |
| Haemato-oncology                    | Haematologists specialising in treatment of haematological malignancies.   |
| HDU                                 | High dependency unit beds that are available if need be to patients treated with SACT. A high dependency unit (HDU) is an area for patients who require more intensive observation, treatment and nursing care than can be provided on a general ward. It would not normally accept patients requiring mechanical ventilation, but could manage those receiving invasive monitoring.   |
| Hickman catheter                    | Thin, long tube made of flexible, silicone rubber/plastic. It is surgically inserted into one of the main veins leading to the heart.  |
| ICU/ITU                             | An intensive care unit (ICU) is an area to which patients are admitted for treatment of actual or impending organ failure, especially when mechanical ventilation is necessary.  |
| Medical assessment unit             | A dedicated unit or ward in which medical patients undergo rapid and rigorous assessment and initial treatment with the purpose of establishing their need for admission to or discharge from hospital.  |
| Medical Oncology                    | Physician specialising in treatment of cancer using systemic therapy.  |
| Hours of Work                       | Day: 08:00-17:59. Evening: 18:00-23:59. Night: 00:00-07:59 Office hours: 08:00-17:59 Monday to Friday. Out of hours: 18:00-7:59 Monday to Friday and all day Saturday and Sunday.  |
| Oncology                            | Medical oncology and clinical oncology.  |
| Palliative Care<br>Specialist Nurse | e.g. Macmillan nurse, hospice nurse.   |
| Parenteral                          | Administered by means other than through the alimentary tract.   |
| PICC line                           | This involves the placement of a long plastic catheter into one of the larger veins of the arm.  |
| Port-a-Cath                         | The port is about the size of a 5p, or 10p coin, only thicker, and will show only as a bump underneath the skin.   |
|                                     | (Continued on next page)   |

(Continued on next page)

## **DEFINITIONS**

| (SACT) Initiator                       | The doctor who makes the decision to commence a patient on a course of SACT.   |
|--|--|
| (SACT) Prescriber                      | The clinician who prescribes a cycle of chemotherapy.  |
| Research Nurse                         | Nurse employed to co-ordinate clinical trials.   |
| Stand-alone oncology unit              | Oncology unit on a separate site to general medicine and general surgery.  |
| Systemic Anti-Cancer<br>Therapy (SACT) | To include all "traditional" cytotoxics - intravenous, oral, subcutaneous, intrathecal, or intraperitoneal chemotherapy, monoclonal antibodies, but excluding vaccines, gene therapy and hormonal agents (please see protocol for more information). |
| Tumour Site Specialty<br>Nurse         | e.g. breast care nurse, urology specialist nurse.  |
