

Pleural Procedures Study

NCEPOD are running a study to look at the care provided to patients who have had a **chest drain**.

Who can get involved?

Adult patients (18 or older) who have had a chest drain.

What will be involved?

A short survey about the healthcare you received when you had a chest drain. We are interested in care that was particularly good and where you feel that it could have been better.

Scan the QR code to complete the survey or go to <https://forms.office.com/e/FzDNQ09TPJ>

See <https://www.ncepod.org.uk/pleural.html> for more information about the study
